### WORK EXPERIENCE

#### AGILE ENGINE / Sr Software Engineer at Indeed SEPTEMBER 2022 - PRESENT, Remote

Working on a project to collect metrics, study user behavior, derive insights, and implement new products and website features.

- \* Developing frontend functionality and new UI components.
- \* Code refactoring and performance optimization.
- \* Improvement/extension of existing features.

#### VITAU / Sr Frontend Engineer

JANUARY 2021 - AUGUST 2022, Remote

Development main product for the operations team, in charge of new features, project optimization, architecture and maintenance.

- \* Maintain code quality through code reviews, pair programming, and general project setups, having a continuous delivery to production.
- \* Responsible for making updates to improve the CI/CD processes, as well as keeping the latest project changes up to date.

#### MIPOS / Frontend Engineer Lead

JULY 2019 - DECEMBER 2020, Remote.

Leading the frontend team to have strong communication, high performance problem-solving and developing skills.

- \* In charge of web and mobile projects (POS and admin dashboard) connecting our restful API and real-time services with integrated delivery apps.
- \* Maintain a high quality of code, promoting the best practices: code review, testing, high quality code, pipelines and CI/CD process.

#### SENSAI / Software Engineer

OCTOBER 2018 - JUNE 2019, Monterrey, MX.

Development productivity platform for manufacturing operations that increases throughput and decreases downtime.

- \* Collect, manage and analyze event data using sockets and pub/sub channels from IoT inputs to show real time performance data in production lines.
- \* Development of mobile applications using bluetooth devices to measure the quality of the parts of the production line and create performance reports.
- \* Code and SQL optimization to improve product performance and optimize results in real time.

#### AXOSNET / Software Engineer

MARCH 2018 - SEPTEMBER 2018, Monterrey, MX.

Development of front-end applications using the SAPUI5 framework using its components and optimizing code for reuse.

- \* SAP Cloud Platform Consultant using tools as identity providers, document services, authentication services and git repositories management.
- \* Backend development for the construction of middleware and RESTful APIs managing information from own databases and ABAP scripts.

#### MX GLOBAL SOLUTIONS / Software Engineer

JANUARY 2017 - FEBRUARY 2018, Tepic, MX.

Development of web, hybrid and desktop applications

- \* Design data model and develop APIs with NodeJS and MongoDB.
- \* Architecture and construction of Ionic app for the integration of own and third-party services
- \* Configuration and maintenance of linux servers
